

Sun in Aquarius/Moon in Pisces:

True Believer

You are a very kind and helpful person and are able to identify and sympathize with almost everybody. Your innocent soul is humble, generous, and sensitive. You know the difference between right and wrong because you have an innate sense of integrity and wisdom. But your spirituality is not always synchronized with pragmatic common sense. You have no cunning or shrewdness and are completely trusting. Your faith in other is total and you would be eaten alive if other people were not so kind to you. Fortunately people never fail to respond in a positive way to your innocence. There is a dreamy look that Aquarius- Pisceans have and it seems they have just woken up and do not know where they are. This approach is used in everything, as though existence is carried on in several dimensions. If you see the entire world at once you get mixed up because you cannot really separate the parts. It is possible a religious path might be for you because you are quite spiritual. Some Aquarius-Pisceans are even drawn to the monastic life. Furthermore, you may be especially tuned in to the occult and the mysterious. More mainstream people find this quite odd about you. Sri Rama Krishna, the founder of the Vedanta Society, represents a very evolved Aquarius-Pisces. Your imagination is strong and you have a very visual mental framework. Given the right motivation and teaching, you might be an artist or other creative entrepreneur. However you must acquire some direction and discipline from others to be successful. Without this you are a ship with no rudder to guide you to your destination. You are a sponge for the stress or feelings around your environment. That is a strong influence on you. Meditating, reading or listening to music from time to time is good for you. However you must be careful that isolation does not take you away from involvement with others. High technology or heavy competition is not suited for you as a career. Involve yourself in a profession where you can use your compassionate and humanitarian feelings. Or perhaps think in terms of using your powerful clairvoyant skills. Because of your detached character, people might think that you are uncaring. Aquarian detachment may lead others to believe that you are not very sensitive, but the opposite is actually true.
