

Sun in Aries/Moon in Aries:

Swashbuckler

A bright fresh charm attracts others to you, as does your love of life. On the other hand, your insensitive nature can keep people from getting too close. Making time to listen to your friends' problems or to help them with advice is difficult for you. You have the highest degree of intuition as well as intelligence. There is some selfishness and acting without reflection on the part of the Aries-Aries combination. This is coupled with impatience; all of which is left over from childhood. A store of energy that cannot be depleted drives them. A full life of experience is what you strive for, and you hold that there is nothing that can replace this. Like a daredevil, there is a foolhardy and recklessness in your character. Essentially it is a challenge that is wanted, whether on the job, in love or just life itself. You need to listen more carefully to what others say because you are not infallible. Think things over prior to acting and do not be so impatient to do something. There is a tendency for Aries-Aries natives to forget things quickly and live in the present. Behaving like this can lead to the repetition of mistakes. There is no substitute for the best teacher and that is experience. You also need to find an outlet for all that store of energy. In order to succeed in various parts of your life it is necessary to have physical activity of some sort. This is also significant for physical well-being. You need to work on being a bit more sensitive in your relationships with others, particularly your romantic partner. Their needs, desires and emotions are of importance for a good relationship. You have a fundamental selfishness under your passion and enthusiasm, as you seek out love. You are prone to see love as a sport and, in addition, you have a strong sex drive. A closed and strict routine would certainly never permit happiness for you, because variation and challenges are what your inner motivation needs. A career that has a lot of responsibility and stiff competition brings out your best work, but you need to have something that does not enclose you in boredom and frustration. Positions of this nature could actually damage or destroy your sense of self. Working for progress and change brings out your pioneer spirit and you are the pathfinder in that regard. Aries-Aries individuals are often successful in the area of Medicine and Science. Surgery is a good choice and also in social activism.
